RE: Council for Tobacco Research - Research Grants

We would appreciate receiving three (3) copies of current guidelines and, if applicable, application forms for the above referenced program. Please indicate this year's application deadlines or target dates, if any, and whom to contact for further information.

Colorado State University's Office of Sponsored Research is responsible for providing our 1200 faculty members with current details of potential support for scholarly activity. Such support spans fellowships, research grants and contracts, travel grants, training grants, post-doctoral programs, and special awards, to name a few.

We have found it helpful to have available to our faculty additional background information. This might be in the form of staff directories, annual reports, outlines of funding mechanisms, and descriptions of current thematic research priorities. Any information you can provide in addition to specific guidelines, applications, and deadlines, will be helpful.

A mailing label is attached for your convenience.

Thank you.

Celia S. Walker
